In negotiation, there often will be issues that you do not care about—but that the other side cares about very much! It is important to identify these issues.

(A) Now you are in a position to give her something that she values (at no cost to you) and get something of value in return. For example, you might start a month earlier and receive a larger bonus for doing so.

(B) Similarly, when purchasing my home, I discovered that the seller was very interested in closing the deal as soon as possible. So I agreed to close one month earlier than originally offered, and the seller agreed to a lower price.

(C) For example, you may not care about whether you start your new job in June or July. But if your potential boss strongly prefers that you start as soon as possible, that's a valuable piece of information.

- ① (A)-(C)-(B) ② (B)-(A)-(C)
 ③ (B)-(C)-(A) ④ (C)-(A)-(B)
 ⑤ (C)-(B)-(A)

2. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

Andrew Carnegie, the great early twentieth century businessman, once heard his sister complain about her two sons.

(A) Within days he received warm grateful letters from both boys, who noted at the letters' end that he had unfortunately forgotten to include the check. If the check had been enclosed, would they have responded so quickly?

(B) They were away at college and rarely responded to her letters. Carnegie told her that if he wrote them he would get an immediate response.

(C) He sent off two warm letters to the boys, and told them that he was happy to send each of them a check for a hundred dollars (a large sum in those days). Then he mailed the letters, but didn't enclose the checks.

- ① (A)-(C)-(B) ② (B)-(A)-(C)
 ③ (B)-(C)-(A) ④ (C)-(A)-(B)
 ⑤ (C)-(B)-(A)

When you hit puberty, however, sometimes these forever friendships go through growing pains.

Childhood friends—friends you've known forever—are really special. (①) They know everything about you, and you've shared lots of firsts. (②) You find that you have less in common than you used to. (③) Maybe you're into rap and she's into pop, or you go to different schools and have different groups of friends. (④) Change can be scary, but remember: Friends, even best friends, don't have to be exactly alike. (⑤) Having friends with other interests keeps life interesting—just think of what you can learn from each other.

4. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

In return, the guest had duties to his host.

Geography influenced human relationships in Greece. Because the land made travel so difficult, the guest-host relationship was valued. (①) If a stranger, even a poor man, appeared at your door, it was your duty to be a good host, to give him a shelter and share your food with him. (②) "We do not sit at a table only to eat, but to eat together," said the Greek author Plutarch. (③) Dining was a sign of the human community and differentiated men from beasts. (④) These included not abusing his host's hospitality by staying too long, usually not more than three days. (⑤) A violation of this relationship by either side brought human and divine anger.

Today car sharing movements have appeared all over the world. In many cities, car sharing has made a strong impact on how city residents travel. ①Even in strong carownership cultures such as North America, car sharing has gained popularity. ②In the U.S. and Canada, membership in car sharing now exceeds one in five adults in many urban areas. ③Strong influence on traffic jams and pollution can be felt from Toronto to New York, as each shared vehicle replaces around 10 personal cars. ④The best thing about driverless cars is that people won't need a license to operate them. ⑤City governments with downtown areas struggling with traffic jams and lack of parking lots are driving the growing popularity of car sharing.

5. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

A large American hardware manufacturer was invited to introduce its products to a distributor with good reputation in Germany. Wanting to make the best possible impression, the American company sent its most promising young executive, Fred Wagner, who spoke fluent German. When Fred first met his German hosts, he shook hands firmly, greeted everyone in German, and even remembered to bow the head slightly as is the German custom. Fred, a very effective public speaker, began his presentation with a few humorous jokes to set a relaxed atmosphere. However, he felt that his presentation was not very well received by the German executives. Even though Fred thought he had done his cultural homework, he made one particular error. Fred did not win any points by telling a few jokes. It was viewed as too informal and unprofessional in a German business setting.

☒

This story shows that using (A) in a business setting can be considered (B) in Germany.

(A) (B)

- ① humoressential
- ② humorinappropriate
- ③ gesturesessential
- ④ gesturesinappropriate
- ⑤ first namesuseful

Pain serves as an early warning system by causing an instant withdrawal from any source of potential injury. ① For example, suppose you are walking barefoot on the beach and feel something sharp under your foot. ② The pain will cause you to quickly draw your foot upward, and this might cause only a slight cut and prevent more serious damage. ③ In addition, no matter how weak the pain is from the cut, it is not easy to cure the injury completely. ④ When you accidentally step on a beehive or jellyfish, the pain will do the same thing for you. ⑤ It will make your heart rate go up and help you run away from the dangerous situation.

6. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

You've probably heard the saying, "It's raining cats and dogs!" That's just an expression to say that it's raining very hard. But would you believe that one day in France it really rained frogs?

(A) This cloud has wind speeds of about 50 miles per hour. It can reach up to four miles high in the atmosphere. Just like a land tornado, a waterspout lifts things up and swirls them around, sometimes dropping them far away.

(B) Scientists believe a waterspout made the frogs fall. Waterspouts are like tornadoes that form over large lakes or oceans. A waterspout forms when warm, moist air meets cold, dry air and creates a thick, spinning cloud.

(C) It started out just a typical rainy day in a small town near Paris. People went out with raincoats and umbrellas. Everything seemed normal. Suddenly, frogs started falling from the sky. They bounced off people's heads. Everyone was scared. What was happening?

7. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

The pigeons in Liverpool in North West England are getting out of hand. They're flying all over the place, creating trouble. Liverpool city has decided to scare off the pigeons, and help clean up the city.

(A) The mechanical birds, called "Robops," have been placed on the roofs of buildings around Liverpool. The robots can move their head around, springing up and down on their legs and even turning toward the wind.

(B) To do so, robotic falcons have been created. The robots, made by a Scottish company, resemble swift and cruel falcons.

(C) In addition, they can flap their wings from time to time, and cry loudly enough to scare the problem pigeons away. As a result of these scaring techniques, it is hoped that the pigeon population will move out of the city center and into parks and green areas.

8. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Despite these benefits, however, most people prefer driving their cars to make short trips of a mile or less, causing a major pollution problem.

Cars create a tremendous amount of pollution, and cause many of the environmental issues we face today. (①) Biking, however, provides an extremely eco-friendly way to travel. (②) Bicycles consume no gas and release no exhaust, and every mile you travel by bike prevents about one pound of CO2 from entering the atmosphere. (③) In addition, the energy and materials spent to produce one automobile could be used to create a lot of bikes. (④) A lower percentage of people in the 21st century ride bikes than in the previous century. (⑤) Therefore, if you want to save the Earth, traveling by bicycle offers an excellent way to get started.

9. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

One powerful habit, in other words, can cancel out two or more less powerful habits, in terms of the influences they have on our lives.

According to a famous study by University College of London, the habit formation process took anywhere from 18 to 254 days. (①) The study also found that more complex behaviors, such as swinging a golf club, required more time for a habit to form. (②) Less complex habits, such as teaching children to brush their teeth every day, could be formed in a matter of days. (③) The study made clear that habits come in many shapes, sizes, and shades, each with a unique level of complexity and influence over our daily lives. (④) The adoption of some habits affects our lives more than others. (⑤) Drinking sweet drinks, for instance, is a bad habit that can negatively cancel out the benefits of daily exercise and good nutrition.

10. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

A wealth of research shows the importance of face-to-face contact. One experiment done by two researchers at the University of Michigan asked groups of six students to play a game in which everyone could earn money by working together. One set of groups met for ten minutes face-to-face to discuss strategy before playing. Another set of groups had thirty minutes for electronic interaction. The groups that met in person worked together well and earned more money. On the other hand, the groups that had only connected electronically fell apart, as the members put their personal gains ahead of the group's needs.

⇒
According to the experiment, face-to-face contact led to more (A) than electronic interaction, although the latter was allowed to interact (B) .

(A) (B)

- ① cooperation longer
- ② cooperation shorter
- ③ indifference deeper
- ④ conflict longer
- ⑤ conflict shorter

By almost every measure — wealth, education, and literacy — China was superior to the West. ① The Chinese produced the world's finest textiles and ceramics and introduced the world's first paper money. ② They pioneered advances in ship-related technology, too. ③ While Europeans were still using tiny ships powered by muscle, the Chinese were sailing huge, sectioned ships, with up to five hundred men. ④ The Chinese believed that there was only one Heaven, thus there could be only one ruler — the emperor. ⑤ Meanwhile, using advances in coal and hydraulic machines, they produced an impressive amount of goods, from plows to Buddhist statues.

One study at a manufacturing plant in Ohio examined assembly-line workers very carefully. They were given official authority to make small decisions about their schedules and work environment. They designed their own uniforms and had authority over the periods of working time in the factory. Nothing else changed. All the manufacturing processes and pay scales stayed the same. Within two months, productivity at the plant increased by 20 percent. Workers were taking shorter breaks. They were making fewer mistakes. Giving employees a sense of control showed how much self-discipline they could bring to their jobs.

⇒
When the plant workers were allowed to (A) a few things about their job, they used their self-discipline and made positive changes in their (B) .

(A) (B)

- ① decide efficiency
- ② decide communication
- ③ suggest efficiency
- ④ suggest communication
- ⑤ discuss thinking

The most important thing two working parents can give their children is a strong marriage. ① I'm not saying quality time spent with your child isn't important; I'm saying it's more important that you and your spouse spend quality time with each other. ② If five out of seven days a week you have only three hours together, that's all the more reason for you to put your spouse first during that time. ③ Parents need time together as husband and wife, and children need to see their parents spending this time together. ④ Husband and wife should understand that solitude isn't a threat to their relationship, but rather, beneficial to connection. ⑤ By seeing their parents' strong marriage, children can learn that a good relationship between the husband and wife is the key element in a family.

16. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

There is a fascinating story from the 1950s, which serves to illustrate how our old reactions continue to affect us in our present daily lives.

(A) Some five years later, these forgotten soldiers attacked a pleasure craft that casually landed on one of the islands. They had got themselves ready to fight enemies, still believing the war was going on.

(B) The story is about some Japanese soldiers who were left in the South Pacific long after World War II had ended. The Japanese Navy had left soldiers behind on many small islands throughout the Pacific and forgotten about them.

(C) For years, the soldiers had dutifully kept their guns oiled and remained alert. After the attack, the Japanese Navy tried to remove the soldiers, but they held out on the islands for some time.

17. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

Most of us have thought about an unrealistic picture of life on a desert island. We imagine a desert island to be some sort of paradise.

(A) Perhaps there is an element of truth in both these pictures. Ironically, however, few of us get an opportunity to face both the miserable and wonderful situation even for a single day.

(B) For us, a desert island is a place where the sun always shines, and life there is simple and good. Ripe fruit falls from the trees and we never have to work.

(C) The other side of the picture is quite the opposite. Life on a desert island is miserable. We either starve to death or live like Robinson Crusoe, waiting for a boat that never comes.

- ① (A) — (C) — (B) ② (B) — (A) — (C)
③ (B) — (C) — (A) ④ (C) — (A) — (B)
⑤ (C) — (B) — (A)

18. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

But that fact did not comfort many frightened people who imagined the end of the world was very near.

One of the most spectacular comets of the 20th century was Halley's Comet in 1910. The Earth passed through the comet's tail on this occasion. (①) Just before it did so, many Americans were afraid that poisonous gases in the tail would kill them. (②) In other words, they thought the world would end on that day! (③) Actually, there was no danger. (④) The gases in the comet's tail were so thin that they were harmless. (⑤) According to a report in the San Francisco Bulletin, a man in Los Angeles dug a cave in a hillside, put an airtight door on it, and hid inside to escape the comet.

⑤의 바로 앞 문장에서 유기농 파이의 4분의 1쪽이 아침식사로 좋지 않다고 했는데, 주어진 문장에서는 그 이유를 설명하고 있으므로, 주어진 문장은 ⑤에 들어가는 것이 가장 적절하다.

The reason is that it contains way too many calories, and too much sugar and fat for a single meal.

The word organic is attractive, but it's also misleading. (①) Organic means that a food is grown without pesticides or other chemicals and is not genetically modified. (②) But organic food says absolutely nothing about the nutrient value of the food itself, or whether it's a good dietary choice, or whether it has excessive fat, or sugar. (③) Is a quarter of an organic pie good for breakfast? (④) That's not a healthy breakfast, even if it is chemical-free. (⑤) Organic sugar is still sugar, organic white flour is still white flour, and organic butter is still butter.

20. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Most habits are usually good when they are first formed. That is, for many of the habits that you do not create intentionally, there must have been some value to performing that particular behavior. That value is what causes you to repeat the behavior often enough to create the habit. I used to bite my fingernails, when I was a kid. It became a habit that was ultimately very hard to break. When I started doing it, it must have felt good or relieved stress or at least it must have made my nails shorter. Though I couldn't see any harm in biting my nails at first, I eventually noticed a downside to my habit — my fingernails looked bad. And so, I had to break the habit.

☒

Some habits begin because they are (A) , but they often prove to have a(n) (B) in the end.

(A) (B)

- ① useful expression
② useful disadvantage
③ original weakness
④ insufficient advantage

⑤ insufficient intention

You may have heard an old saying, “Age is something that doesn’t matter, unless you are a cheese.” Many people are lively and creative in old age like the following examples. ① Eightyseven-year-old Mary Baker Eddy founded The Christian Science Monitor, one of the world’s greatest newspapers. ② Pablo Picasso enjoyed painting and drawing at the age of ninety. ③ When she was 100 years of age, Grandma Moses was still painting, which she had begun at the age of eighty. ④ When her albums topped the charts at the age of thirty-five, Madonna said she would like to sing a song until ninety to keep her popularity and fame. ⑤ George Bernard Shaw was 94 when one of his plays was first produced.

21. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

How can you tell if something is living or non-living? Look around your classroom and decide what might be living and non-living.

(A) For example, clouds can move across the sky. A fire can grow and get larger. However, for something to be called living, it must have all the features of living things.

(B) You would be likely to say your teacher and you are living and your desk and chair are non-living. However, how do you know this? Usually it’s easy to tell if something is living or non-living.

(C) You would probably say you are living because you can move, grow, and breathe. Your desk can’t do these things, so it is non-living. However, sometimes non-living things can do some of the things that living things can do.

- ① (A)—(C)—(B) ② (B)—(A)—(C)
③ (B)—(C)—(A) ④ (C)—(A)—(B)
⑤ (C)—(B)—(A)

22. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

Although most people think Christopher Columbus discovered America, Leif Ericsson was probably the first European to visit the New World. Leif left his home in Norway to go to Greenland.

(A) However, the Native Americans did not want the people there. They destroyed their villages many times. Around 1005 A.D. the Norse people gave up. The Norse people had oral legends about what happened. However, no one was sure if the stories were true.

(B) When he found Greenland covered with ice, he wondered if there might be better land further west. He landed in Canada. He named it Vinland. Then he returned to tell others about the place. The next year men and women set off to build homes in the new land.

(C) Now a Norse spindle has been dug up in Newfoundland in Canada. A woman used it to spin wool into yarn 1,000 years ago. Although many people used spindles, only the Norse people used this kind. This simple tool proves that they were in America long before Columbus set sail.

Every design proposal is planned in a close relationship with a changing and growing understanding of the situation (the problem).

To design is to create something new. Design is not the same as problem solving in the mathematical or logical sense. (①) Based on the actual meaning of the words problem and solving, problem solving means that certain problems exist and that they are solvable. (②) In most areas, problem solving also means that it is possible to determine if a problem is solved or not. (③) Most important, problem solving means that a solution is either right or wrong. (④) However, in design there are no correct answers. (⑤) Since this relationship is a continuing process, it is never possible to determine whether a design proposal is right or wrong.

24. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

Opportunity cost includes not just the dollars you give up but also all costs involved with your purchase.

Opportunity cost is the highest-valued alternative that must be given up when a choice is made. If you have \$25, you could buy many things. Suppose you select a video game. (①) The cost of the video game is \$25, but more accurately, it is anything else that you could have bought with \$25. (②) So we say the opportunity cost of the video game is the benefit you do not enjoy from buying something else. (③) For instance, buying a used book saves money but could increase disappointment and affect your grades. (④) The book might be missing pages, unreadable at times, or out of date. (⑤) The full opportunity cost of the used book is the price you paid for the used copy plus the disappointment of having an incomplete book.

25. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

In one experiment, Latane and Darley made a student alone in a room pretend to have an epileptic fit. When there was just one person next door, listening, that person rushed to the student's aid 85 percent of the time. When participants thought there was one other person in the other room, this dropped to 65 percent. When they thought that there were four others also overhearing the fit, they came to the student's aid only 31 percent of the time. Similar trends have been seen in many other experiments, in which over 6,000 participants have had opportunities to respond to apparent emergencies, including fires, car crashes, and flat tires, as well as less urgent needs to answer a door or to pick up objects dropped by a stranger.

⇒

When there is an emergency, the (A) people there are, the less likely each person is to (B) .

(A) (B)

- ① fewer hear
- ② fewerhelp
- ③ more help
- ④ more ignore
- ⑤ busier ignore

The Pareto distribution — commonly known as the “80/20 principle” — is surely one of the most popular repeated rules in business. ① The term was named after the Italian economist, Vilfredo Pareto, who first observed it. ② He referred to the frequent observation that 20 percent of one thing was usually responsible for 80 percent of another. ③ For instance, Pareto observed that, at the start of the twentieth century in his native Italy, 20 percent of individuals owned 80 percent of the country's wealth. ④ Every individual, besides, insisted that their wealth was piled up because they worked harder than other people. ⑤ Today, marketing managers across the world have adopted this theory to claim that 20 percent of products are responsible for 80 percent of revenue.

The result was impressive — a dramatic improvement in patients' health and a shorter average stay in the hospital. Many years ago, quite a few hospitals in various states introduced the concept of the "Laughter Room." (①) Based on Norman Cousins' experiences and other laughter research by Dr. Patch Adams, they made a small but particular room for patients. (②) They filled it with joke books and humorous films, and had regular visits from comedians and clowns. (③) Patients were then asked to stay in the room for 30- to 60-minute sessions each day. (④) The Laughter Rooms also showed a decrease in the number of painkillers required by those in pain, and patients became easier to deal with. (⑤) So you could say that people working in the field of medicine now take laughter seriously.

29. 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

This method helped cities grow, and it later had great benefits for archaeologists as well.

Finding buried treasure is a dream of many Americans. (①) But "treasure" does not necessarily mean a chest full of gold and silver. (②) For archaeologists, a buried ship is a treasure because it can show much about the people who made it, sailed it, and used it for trade or exploration. (③) Sometimes ships were buried deliberately under American cities. (④) As a city needed more land, one way to get the land was to sink ships close to shore and cover them with dirt. (⑤) When the buried ships were found during preparations for building, the ships served as "time capsules" that showed what kinds of tools people of that time used.

30. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

When people want to be open or honest, they will often hold one or both palms out to the other person and say something like, "I didn't do it!" "I'm sorry if I upset you," or "I'm telling you the truth." Like most body language signals, this is a completely unconscious gesture, one that gives you an intuitive feeling that the other person is telling the truth. When children are lying or concealing something, they'll often hide their palms behind their backs. Similarly, a man who wants to conceal his mistake at his workplace might hide his palms in his pockets while talking with his boss. Salespeople are also taught to watch for a customer's palms when he talks about whether he will buy a product or not, because when someone is giving valid reasons, he usually shows his palms.

☒

You should check whether people's palms are (A) when you want to know if what people say is (B) .

(A) (B)

The feeling of being a part of a family is an advantage that small businesses have over larger ones. ① Employees are treated more like family members, and, in many cases, they are truly both a family member and a part of the family business. ② A business can face any risk, and the risk can worsen when the business is owned by a family. ③ This feeling of family often creates a tremendous amount of energy during projects and tough times. ④ The Pittsburgh Pirates of 1979 used the theme of “We Are Family” to help them win the World Series. ⑤ The spirit of family led them to their title, and it can also lead your small business to great success.

But a cheap solar cell can only convert about 15% of the power, or about 150 watts per square meter. Many environmentalists believe that the best source of energy for the long-term future is sunlight. (①) It is “sustainable” in the sense that sunlight keeps coming as long as the sun shines, and the sun is expected to shine for many billions of years. (②) Solar energy can be converted to electricity by using solar cells, which are crystals that convert sunlight directly into electricity. (③) The power available in sunlight is about one kilowatt per square meter. (④) So if we could make use of all of the solar energy falling on a square meter for power production, that energy would generate one kilowatt. (⑤) The rest is converted to heat or reflected. [3점]

*string: 줄

In an animal study, African gray parrots were given a task to get a nut suspended from a string. Succeeding in the task required repeatedly pulling at the string with the beak and putting it beneath the foot. Two parrots who had received no training in human words immediately solved the task. In contrast, two parrots that had been trained looked at the nuts, looked at the trainer and said, “Want nut.” To the trainer’s order “Go pick up nut,” they both replied, “Want nut.” This verbal interaction was repeated several times per trial, and the parrots made no attempts to get the nuts for themselves. Later, one of the verbally trained parrots reached out toward the trainer and consistently repeated, “Want some.”

Berlin, 1927: a group of university students and professors visit a restaurant. The waiter takes order upon order, including special requests, but does not bother to write anything down. This is going to end badly, they think. But, after a short wait, all diners receive exactly what they ordered. After dinner, outside on the street, Russian psychology student Bluma Zeigarnik notices that she has left her scarf behind in the restaurant. She goes back in, finds the waiter with the incredible memory, and asks him if he has seen it. He stares at her blankly. He has no idea who she is or where she sat. “How can you have forgotten?” she asks angrily. The waiter replies curtly, “I keep every order in my head until it is served.” This occurrence was later tested in a lab. Subjects were given simple tasks to do, but some were interrupted before they could finish them. Later it was found that those who were interrupted could remember the tasks much better.

⇒

People tend to remember (A) tasks better than (B) tasks.

(A) (B)

- ① simple complex
- ② incompletecompleted
- ③ expected unexpected
- ④ important unimportant
- ⑤ interesting uninteresting

People often find it easier to avoid communicating something that they think is going to be controversial — this is human nature. ① A manager may avoid telling his or her employees that their work attitude is unsatisfactory. ② You may put off having a difficult conversation with your partner, especially if it concerns some kind of financial or emotional issues. ③ A child may be afraid of telling his or her parents that he or she is struggling with classes at school. ④ Most people know that putting off their work is not a good habit. ⑤ Some people will also recognize that putting off a difficult conversation reduces short-term anxiety.

It is worth stressing that social-network effects are not the only explanation for the rapid spread of obesity. Over the past twenty years, there have been enormous changes that promote inactivity — such as labor-saving devices, sedentary entertainment, and the general transition to a service economy.

(A) If something takes root in a networked population, whether a pathogen or a norm about body size, it can spread across social connections, striking ever larger numbers of people.

(B) There have also been dramatic changes in food consumption, resulting from the decreased price of food, shifts in nutritional content and portion size, and increased marketing.

(C) Yet social networks also play an important role. Though other external factors are the initial drivers for higher obesity rates, social networks can magnify whatever they are seeded with.

Day after day, news programs report the results of opinion polls. Lots of people listen with interest to poll results. These people are impressed by the polls because they are presented as “scientific.” And they are fascinated that their results are reported with extraordinary precision (for example, “41 percent of Americans believe...”). And they tend to believe that the authority figure reporting the results is objective and knowledgeable. In short, they have great confidence in opinion polls. However, some potential problems can make polls unreliable regardless of their original purpose. For example, the people writing the questions might be biased. Or the sample population might not reflect the population as a whole. Or the questions might require knowledge that some participants don't have. Or the wording of the questions might suggest “right” and “wrong” answers.

Although people consider the result of polls (A) , the process of surveying public opinion may not be (B) .

(A) (B)

- ① groundless partial
- ② ambiguous objective
- ③ ambiguouspartial
- ④ trustworthy distorted
- ⑤ trustworthy objective

Human senses are not tuned for detecting CO₂, which is why we call it an odorless, colorless gas. ① If we did detect it, by definition it would have smell or color because our senses would give it recognizable qualities. ② In our evolutionary past, we did not have any need to develop sense organs for this gas. ③ But, just as some animals can detect infrared waves that we cannot, some of them do sense CO₂ levels outside their bodies. ④ Furthermore, the rise of CO₂ will likely lead to serious disruptions in agriculture, coastal cities, and human health. ⑤ The mosquito, for one, uses concentrations of CO₂ to help it locate a living mammal, such as a moose or a human, whose breaths continually spread a cloud of elevated levels of CO₂ around its body.

Of course, people do keep cats and birds together and in some rare situations it probably works.

Cats are natural predators where birds are concerned. (①) In a free living situation a cat would attempt (and probably succeed) in hunting available birds among other quarry. (②) All things considered it is probably not a good idea to try and get these species to live together. (③) But in those situations there are a lot of conditions. (④) For instance, certain macaws can weigh up to 4 pounds and if well adjusted and living in a stable well-supervised situation, they can probably intimidate a young kitten into keeping a considerable distance. (⑤) But look at the conditions: a cat is young enough to learn boundaries from a bird physically large enough to defend itself.

It is said that two heads are better than one. However, studies suggest that groups tend to make decisions that are about as good as the decision made by the average member — or worse. One reason for this is that groups tend to spend most of their time talking about the common information that all members share rather than the unique information that only a few members possess. One member of a student entertainment committee may know a lot about a restaurant's superb cuisine, and another may know a lot about its amazing loudspeaker system. If every member of the committee knows about the restaurant's location being a bit far away, however, then location may be weighted too heavily in the group's decision, despite the fact that it may be the least significant piece of information.

⇒

Groups do not make (A) decisions than their average member because groups value information that is (B) rather than important.

(A) (B)

- ① better accurate
- ② better familiar
- ③ faster rare
- ④ faster accurate
- ⑤ stronger familiar

From a correlational observation, we conclude that one variable is related to a second variable. But neither behavior could be directly causing the other even though there is a relationship.

(A) They found the best predictor to be the number of tattoos the rider had. It would be a ridiculous error to conclude that tattoos cause motorcycle accidents or that motorcycle accidents cause tattoos.

(B) The following example will illustrate why it is difficult to make causal statements on the basis of correlational observation. The researchers at the U.S. Army conducted a study of motorcycle accidents, attempting to correlate the number of accidents with other variables such as socioeconomic level and age.

(C) Obviously, a third variable is related to both—perhaps preference for risk. A person who is willing to take risks likes to be tattooed and also takes more chances on a motorcycle.

So skin cells, hair cells, and nail cells no longer produce new cells.

Do hair and fingernails continue to grow after a person dies? The short answer is no, though it may not seem that way to the casual observer. (①) That's because after death, the human body dehydrates, causing the skin to shrink, or become smaller. (②) This shrinking exposes the parts of the nails and hair that were once under the skin, causing them to appear longer than before. (③) Typically, fingernails grow about 0.1 millimeters a day, but in order to grow, they need glucose—a simple sugar that helps to power the body. (④) Once the body dies, there's no more glucose. (⑤) Moreover, a complex hormonal regulation directs the growth of hair and nails, none of which is possible once a person dies.

Social psychologists at the University of Virginia asked college students to stand at the base of a hill while carrying a weighted backpack and estimate the steepness of the hill. Some participants stood next to close friends whom they had known a long time, some stood next to friends they had not known for long, some stood next to strangers, and the others stood alone during the exercise. The participants who stood with close friends gave significantly lower estimates of the steepness of the hill than those who stood alone, next to strangers, or next to newly formed friends. Furthermore, the longer the close friends had known each other, the less steep the hill appeared to the participants involved in the study.

☒

According to the study, a task is perceived as less (A) when standing next to a (B) friend.

(A) (B)

Scientists from the University of Buffalo in New York conducted 39 studies and found that people who were given different choices in a multi-course meal ate 44 percent more than the people who were given the same type of food for each course. If you keep eating the same kind of food, you get sick of eating it. That's why you eat more when you eat "family style" in a restaurant where everyone orders something different and you share all the dishes compared to when you order your own main course. This is also the reason why you pig out at an all-you-can-eat buffet. In one study, two groups of female subjects were told to eat as many sandwiches as they wanted. The first

group was offered one type of sandwich; the second group had many types of sandwiches available. Not surprisingly, the second group ate 33 percent more than the first group.

⇒

The (A) of food choices (B) the consumption of food.

During the planning process in 2012/13, however, the Braves expanded the alternatives to include local county sites as well as downtown sites.

A baseball team looking to build a new stadium has to negotiate with the city where the stadium will be built. These negotiations could include rental agreements, sharing parking revenues, and provision of security on game days. (①) The Atlanta Braves had this situation after it was decided that its existing stadium was “well past its use-by date.” (②) The Braves’ existing stadium was built in 1996 for the Olympic Games, was located downtown, and had limited parking. (③) The trend of recent new baseball parks has been to build on downtown sites. (④) Many observers and City of Atlanta officials expected the team to stay in downtown Atlanta and negotiate with the city to either build a new stadium or make a very major upgrade of the existing stadium. (⑤) The Braves eventually settled on a Cobb County location 20 miles from downtown Atlanta that had multiple benefits to the Braves over the downtown sites considered.

Coaches are often quick to give advice; after all, that is what a coach does. But advice given without understanding the other person's perspective can fall on deaf ears and even create communication barriers. Athletes occasionally approach coaches with personal or school problems, and it is tempting for coaches to give advice, hoping to help resolve the issue. Although well-intentioned, this advice may create communication barriers, especially if the athlete's goal was simply to express emotions and vent frustration, discouragement or confusion. When athletes express themselves emotionally, the best course of action is to use active listening skills to convey understanding of their perspective. Simply providing advice may cause an athlete to feel like you are minimizing an issue important to him or her. But if the athlete feels that you're commenting based on what you would do in his or her shoes, he or she will become more receptive to your advice.

⇒ When your athletes try to express themselves emotionally, whether your (A) as a coach works or not depends on how (B) you are.

The individual plants that have more prickly leaves are less likely to be eaten by grazing animals than those that have just a few prickles.

Natural selection is one of the processes by which evolution occurs. In any group of individuals of the same species there will be a few that are better suited to the environment than others. (①) The best adapted individuals survive and breed, passing on their genes to their offspring. (②) This is often called "survival of the fittest." (③) For example, imagine several plants from the same species that have prickly leaves. (④) So more prickly plants survive and produce seeds that grow into plants that also have more prickles. (⑤) Over time, the less prickly plants disappear and the more prickly ones thrive.

80. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Whether we like solitude or not, in our times we must be able to put up with some of it. It is difficult to learn math, or practice the piano, or program a computer, or figure out the purpose of one's life when other people are around. The concentration required to order thoughts in consciousness is easily interrupted by an extraneous word, by the necessity to pay attention to another person. Thus we find that adolescents who feel that they must always be with friends — and these are usually youngsters whose families provide little emotional support — tend not to have the mental energy necessary for complex learning. Even with superior mental aptitude, the dread of solitude prevents them from developing their talents.

☒

(A) solitude can help youngsters to (B) who they are.

☒

If you want to modify people's behavior, is it better to highlight the benefits of changing or the costs of not changing? According to Peter Salovey, one of the originators of the concept of emotional intelligence, it depends on whether they perceive the new behavior as safe or risky. If they think the behavior is safe, we should emphasize all the good things that will happen if they do it—they'll want to act immediately to obtain those certain gains. But when people believe a behavior is risky, that approach doesn't work. They're already comfortable with the status quo, so the benefits of change aren't attractive, and the stop system kicks in. Instead, we need to destabilize the status quo and emphasize the bad things that will happen if they don't change. Taking a risk is more appealing when they're faced with a guaranteed loss if they don't. The prospect of a certain loss brings the go system online.

☒

The way to modify people's behavior depends on their (A): if the new behavior is regarded as safe, emphasizing the rewards works but if regarded as risky, highlighting the loss of staying (B) works.
